

Environmental Policy

Rede D'Or São Luiz registers in its Environmental Policy, endorsed by the company's top management, the main guidelines that summarize its commitment to environmental issues, in accordance with the principles of Sustainable Development.

Objective

Ratify Rede D'Or São Luiz's commitment to environmental issues and establish guidelines aimed at strengthening its environmental performance.

REDE D'OR
SÃO LUÍZ

Guidelines:

Our commitment:

- Ensure full compliance with the laws and environmental requirements inherent to our activities.
- Promote continuous improvement in the environmental management processes in all of our units through periodic assessments of environmental performance results, objectives and goals.
- Adopt management practices and innovative technologies aimed at the efficient use of natural resources and other resources required by the services provided by us in order to minimize the environmental impacts of our activities.
- Develop environmental projects and initiatives as the specificities of the regions where we operate.
- Identify the most relevant environmental risks and establish an appropriate treatment with monitoring and control.
- Seek opportunities to contribute to the achievement of global goals adhering to our business, seeking partnerships, solutions and technologies for the challenges of sustainable development.

In order to assess our environmental performance, we are committed to carrying out periodic environmental audits, verifying compliance with environmental legislation and internal regulations and procedures, as well as compliance with environmental plans, goals and objectives.

Responsibilities Matrix

Rede D'Or São Luiz officers are responsible for promoting the implementation of the basic requirements of each environmental and management guideline of Rede D'Or São Luiz, in their respective sectors, through planned and integrated actions.
